AGING PROJECT

NSHAP COVID-19 Study

This survey is part of the National Social Life, Health, and Aging Project (NSHAP) which is sponsored by the National Institute on Aging. The survey will take approximately 20 minutes to complete.

The survey contains questions about your concerns related to the COVID-19 pandemic and changes with the people you see and talk to, the activities you do, your feelings, and how you are doing generally. Please answer all items as best you can, from your point of view. The information you provide will benefit society by increasing our knowledge about aging and COVID-19.

As always, your individual responses and your name will be kept completely confidential. Taking part in the survey is voluntary. You may elect to skip any questions without penalty.

Please return your completed questionnaire in the preaddressed, postage-paid envelope. If you have any questions about the questionnaire or NSHAP, please contact us, toll-free, at 1-866-309-0540. You can also learn more online at: www.norc.uchicago.edu/nshap.

Thank you again for participating in the NSHAP COVID-19 Study.

This survey is voluntary, but your continued participation in NSHAP, and this particular COVID-19 study, is invaluable. The information you provide will benefit society by increasing our knowledge about aging and COVID-19.

The answers you give will be kept confidential. To protect your confidentiality, your responses to the questionnaire will be identified with a unique numeric identification number. Study results will be made available to the scientific community, but identifying information (such as your name) will not be associated with your data. Data will be analyzed for information on groups of people, not individuals. Your name, address, and telephone number will remain confidential and will not appear in any report, publication, or presentation of this study or its results.

In instances of suspected mistreatment, we may be required to report any incidents of elder mistreatment to your state reporting hotline. The report would only include your name, contact information, and why we are concerned. Your survey information will remain confidential.

Additionally, to help us protect your privacy we have obtained a Certificate of Confidentiality from the National Institutes of Health. With this Certificate, the researchers cannot be forced to disclose information that may identify you, even by a court subpoena, in any federal, state, or local civil, criminal, administrative, legislative, or other proceedings. However, the Certificate cannot be used to resist a demand for information from personnel from the Department of Health and Human Services for audit or program evaluation purposes.

INSTRUCTIONS

In answering these questions, please be as honest and accurate as possible. Most questions will ask you to choose from a list of options. Choose the response that most closely matches your answer, and put a check mark ✓ or ✗ in the box provided on the left. Other questions will not include a list of choices and you should enter your response in the space provided.

Some questions may not apply to you, and you will be asked to skip over them. When this happens you will see an arrow or a note that tells you what question to answer next, like this:

¹ No → *If No, Go to Question 2*

² Yes

If no special instructions are given for your response choice, please continue with the next question.

We would like to learn how the COVID-19 pandemic has changed people's lives, especially the lives of you and your family. We will be asking you questions about your concerns related to the COVID-19 pandemic and changes in the people you see and talk to, the activities you do, your feelings, and how you are doing generally.
