We would like to understand how people's medical history affects their lives, and how use of health care may change as people age. To do that, we need to obtain information about health, health care costs and diagnoses for statistical purposes. The best place to get this information without taking up a lot more of your time is in the Medicare files. Could you give me your Medicare number and social security number for this purpose? (Under the Privacy Act of 1974, providing your number is a voluntary decision. The benefits you may be receiving under this program will not be affected in any way by your decision. Any remaining benefits under this program will not be affected in any way by your decision)
